PROJECTS

Travel Agency [↗](#) |JavaScript, React Js,TailwindCSS, VS Code and npm packages.

Jul2024-Dec2024

- User-friendly website or app interface that allows customers to browse destinations ,book trips, and access travel services.
- It typically includes features like search filters, booking forms, interactive maps, and responsive design for a seamless user experience.
- [Live site here](#)

Food-Delivery-Web Application [↗](#) |Javascript,Html5,CSS3,ReactJS,TailwindCSS.

Jul2024-Dec2024

- Provides an interactive interface for users to browse restaurants, view menus, and place orders online .It features a responsive design with user authentication, real-time order tracking, and secure payment integration.
- The UI includes search filters, cart management ,and location-based restaurant recommendations. Customers can rate and review their orders for better service insights
- The design ensures a seamless experience across desktop and mobile devices.
- [Live site here](#)

QR Code Generator [↗](#) |HTML5,CSS3,JavaScript.

Jul2024-Dec2024

- A QR code generator in JavaScript takes user input (like a URL or text), converts it into a QR code using a library like qrcode.js or qr-code-styling, and displays it on a webpage
- It typically involves an HTML form for input, a JavaScript function to process the data, and a canvas or image element to render the generated QR code. Users can scan the QR code with their devices to access the encoded information.
